

Know Your ABCDE's

To help identify early signs of skin cancer and concerning skin lesions.

A - Asymmetry

One Half is not like the other half.

B - Border

The spot has an irregular, scalloped, or poorly defined border.

C - Color

The spot has varying colors from one area to the next, such as shades of tan, brown, or black or areas of white, red, or blue.

D - Diameter

While melanomas are usually greater than 6 millimeters, or about the size of a pencil eraser, when diagnosed, they can be smaller.

E - Evolving

The spot looks different from the rest or changes in size, shape, or color.

If you have a concerning spot or lesion on your skin, request an appointment with one of our Board Certified Dermatologist.
